

# CAPP *Origami*

## REAGENT RESERVOIRS

## Fold, pour and pipette...

The **CAPP *Origami***<sup>™</sup> represents an innovative way of thinking when it comes to reagent reservoirs.

### Perfect V-shape maximises the full retrieval of all reagents

The shape of the reservoir, along with the stiffness of the material used, ensures that the reservoir forms a sharp V-shape at the bottom. This makes your pipetting easier and also enables you to save on reagents as you only have to pour the amount needed into the reservoir.

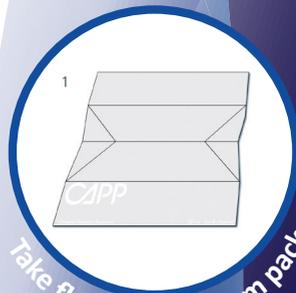

### Flick-up design saves space when stored

**CAPP *Origami***<sup>™</sup> reservoirs are packed as flat sheets which means they take up considerably less room in storage.

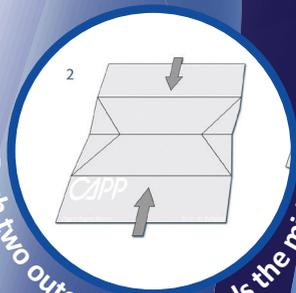

### Easy to use

To use a **CAPP *Origami***<sup>™</sup> reservoir, simply flick it up by pushing the sides together. This is very easy due to the pre-folded lines. As soon as the **CAPP *Origami***<sup>™</sup> reservoir reaches the proper shape you can pour liquid in and start pipetting straight away. The folds and the polypropylene material ensure that the reservoirs stay upright once folded into the correct reservoir shape.

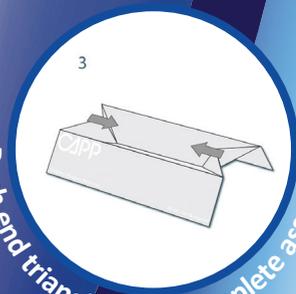

## We take pipetting to perfection.

Take flat reservoir from pack

Push two outer sides towards the middle

Push end triangles in to complete assembly
